

# Wheatgrass Juice

Wheatgrass juice is the nectar of rejuvenation, the plasma of youth, the blood of all life. The elements that are missing in your body's cells - especially enzymes, vitamins, hormones, and nucleic acids can be obtained through this daily green sunlight transfusion. Wheatgrass juice has been proven over many years to benefit people in numerous ways: cleansing the lymph system, building the blood, restoring balance in the body, removing toxic metals from the cells, nourishing the liver and kidneys and restoring vitality.

Most people who have explored the wondrously wide avenues of self-healing have heard about wheatgrass. One ounce of wheatgrass juice has the vitamin and mineral equivalent of 2.2 pounds of fresh vegetables. It contains most of the vitamins and minerals needed for human maintenance, including the elusive B12. Many of the benefits of wheatgrass juice stem from the fact that it is a living food, which is a complete protein with about 30 enzymes and is approximately 70% crude chlorophyll. Up until now, it has been a widely held axiom that to be effective, wheatgrass juice had to be consumed immediately upon juicing. Therefore, it was not easy to grow at home in the quantities required for healing, and thus, did not achieve the popularity that it deserved. However, now with the recent introduction of a synergistic mineral blend called Sea-Solution, things are significantly different. Sea-Solution is pristine seawater that is put through a patented process. The result is a solution that contains all the scientifically-discovered minerals, in inorganic form and perfectly-balanced, plus, enzymes and aerobic bacteria. Wheatgrass grown with Sea-Solution and juiced is found to have a shelf life of 12 days, in addition to having superior nutrition.

Wheatgrass is the green, growing and processing plant that will eventually become a shaft of wheat, produce grain, die, and be harvested. It is a completely different animal when it is still in the grass stage. At only seven days, the wheatgrass is 6 to 9 inches tall and can be cut and juiced. The deep green juice is abundant with vitamins, minerals, enzymes, chlorophyll and vital life energy. It is intensely concentrated and benefits are seen with as little as one ounce a day.
